1 Introduction

1.1 About NV Manager™

"NV Manager™" is an application that works with NV Comfort[®] from WindowMaster. The application enables you to view weather and indoor climate charts as well as log data in table form. The application also enables you to control your controls online and view the status of your controls.

1.2 About this document

This user manual contains instructions on how to install, configure and use NV Manager[™]. We assume that you are reasonably familiar with the use of a PC and with the NV Comfort[®] control. If you need assistance when operating the system, you are welcome to contact us or to visit <u>www.windowmaster.com</u>.

2 Getting Started

access and Online operation".

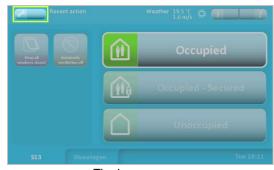

2.1 If you have used the application before

Simply open NV Manager[™] and enter your e-mail address and password and click on login. A certificate may be downloaded, if the control unit is new.

2.2 If you haven't used the application before

To start using the application, you should add your e-mail address in your NV Comfort[®] controls. This will make the controls accept online operation from that e-mail address.

Click the wrench icon on the home screen and go to the system tab.

If you are the administrator of the NV Comfort® enter your email address in the empty text box below "Administrator email address". If you are not the administrator, enter your email address in one of the empty text boxes below "Guest email address".

Now activate "Data upload" and "Data access" as well as "Online operation" by clicking on "On" under the functions respectively. "Online operation" requires "Data access". for further detail see section "Data upload, Data

The guest user with email address "nvc.support@windowmaster.com" is entered as default from the factory. The address enables WindowMaster to gain access to the control unit and perform online support, if required. The address is per default disabled and must be enabled before WindowMaster can gain access to the control unit.

When clicking on the "On" the e-mail address is activated and a new window is opens. When clicking on the "Send invitation" a link to the NV Manager™ is sent to the e-mail address.

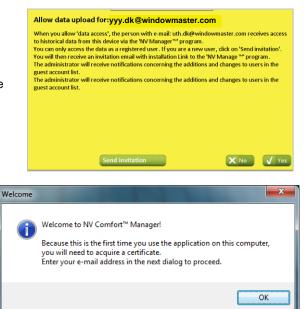

Note that you will need to be able to access the e-mail address to complete the sign-up process.

After installing the application simply start NV Manager[™] to initiate the sign-up process.

If no certificates are present on the PC a Welcome dialog is shown

The home screen

After pressing "OK" you will be asked to enter your e-mail address and password. If you already have a profile use the password for that profile, else provide a desired password.

If you already had a profile, your certificate is downloaded.

If you are creating a new profile, press "Yes" when asked if you want to create a new profile.

Then you need to confirm the password and press "OK".

The creation of the profile is confirmed by a dialog, and the e-mail address must be verified.

yyy.dk@windowm	aster.com
Enter password	<u>l don't see my e-mail addres</u>
	I forgot my passwor
	Log in Cancel

X

Then this dialog is shown to confirm that password reset process is started.

You will then receive a mail like this.

To finalize the password reset, follow the link.

	ОК
	Comfort Password Reset 2014 1:37:00 pm 2 KB
From:	NV Comfort <passwordreset@remote.nvcomfort.com></passwordreset@remote.nvcomfort.com>
To:	yyy.dk@windowmaster.com
Hello	
	e verify and proceed with resetting your NV Comfort account password b g on the link below:
https:/	/www.remote.nvcomfort.com/v?t7UbRVSDxC_tUJ06RptLgg
Thank	: you,
NIVC	omfort

Password reset successful. An e-mail is sent to the address. Please follow link in the e-mail to complete the password reset process.

Password reset successful

Provide a new password and press "Reset".

nabto		
	Reset password	
	Please enter a new password for your account. Password eeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeeee	
© NV Comfort 2007-2010		connect - simple and safe
nabto		
	Password reset	
	Your password has now been reset!	
© 2007-2010		connect - simple and safe

Then the profile just needs to be added again like described as above.

3 Data upload, Data access and Online operation

For each control unit and user – administrator and guest – it must be determined whether the control unit is to upload data to a cloud server and whether the user is to have access to data and online operation.

3.1 Data upload

For each control unit, it must be decided if log data – climate, zone and event data – should be uploaded to a cloud server. The NV Comfort® records log data for:

Rooms: temperature, CO2 level, humidity, lux and event log

Building: event log weather data such as temperature, wind speed and rain

The server is a secure cloud controlled by WindowMaster International. The data is not distributed any further and is only available to WindowMaster International and active users with valid account to the control unit.

From the factory, the data upload is disabled.

The user must actively enable data upload. If data upload is enabled and no user accounts are activated only WindowMaster International has access to uploaded data.

After the first activation, a 3-month free trial period is given, hereafter an annual license can be purchased. Contact WindowMaster – Service for further information.

When activating "Data upload" WindowMaster International's general conditions for data upload and data storage is accepted.

The general conditions concerning data upload and storage can be downloaded from www.windowmaster.com/NVManager.

3.2 Data access

From the factory, the data access is disabled.

The user must actively enable data access.

When data access is allowed, the person with the e-mail address to the left of the button, received access to historical data from this device via the NV Manager™ program.

Only registered users can access data.

The administrator will receive notifications concerning the additions and changes to users in the guest account list.

General	Connected to base station (Wed 08/03/201	/ 15:55)	
	Device name		Data upload
Date and time	Min NVC		On
	Administrator email address	Data access	Online operat
	hbk.dk@windowmaster.com	Un Un	On
Remote users	Guest email address	Data access	Online operat
	nvc.support@windowmaster.com	On Off	On
	hblaastrup@gmail.com	On Off	
		Don Of	
		On Off	
		Dan Off	

3.3 Online operation

From the factory, the online operation is disabled.

The user must actively enable online operation.

When you allow online operation, the person with the e-mail address to the left of the button, is enabled to operate this device online via the NV Manager™ program.

The administrator will receive notifications concerning the additions and changes to users in the guest account list.

4 Using NV Manager™

4.1 Log in

You will be presented with a login screen after starting NV Manager[™]. To log in, first select your e-mail address in the drop-down list, then enter your password in the password box and click "Log In". Refer to section 2.2 if you do not see your e-mail address in the list.

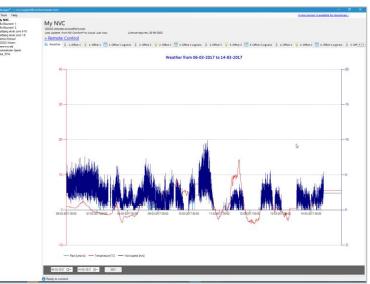

4.2 The control list

After logging in, the main window will appear.

This window is partitioned into 2 separate areas: the control list, which occupies the left side of the window, and the control view, which is situated to the right.

The control list will contain the unique names of all the controls that you can access. If one of your controls does not show up in the list, make sure that your e-mail address is authorized to access it.

To pick the control that you want to work with, simply click it in the control list. After doing so, the control view will contain information about that control.

Main window

se station (Wed 08/03/2017 15:55

upport@windowmaster.

4.3 The control view

The control view contains information about your control and methods to operate. The upper part of the control view contains a link that you can click to operate the control online. The lower part of the control view is divided into tabs. Each tab contains a chart or a table with information from your control unit.

There can be up to 26 tabs. One with a chart with weather data. One with a table with data for the building incl. weather data. Additionally, there can be up to 3 tabs per zone, 2 with charts with indoor climate data and luminance data (only if a lux sensor is associated with the zone) respectively and a chart with zone data.

The tabs for the zones have the same name as the zones have in the NV Comfort®.

Even when a zone is deleted in the NV Comfort®, it will still appear in the NV Manager™ provided that data at some point has been received from that zone.

By pressing "Save to" below the tables, the tables can be saved and exported to excel.

4.3.1 Using the charts

The chart tabs display historical data such as temperature, wind speed, luminance etc. To adjust the start and end date for the charts, use the two date pickers in the bottom of the screen.

4.3.2 Using online operation

You can use the online operate feature to operate the control as if you were right in front of it. Click the "Remote Control >>" link to start a session. It may take a few minutes for the session to start. You can only control one control at a time.

4.4 Language settings It is possible to change the language in the NV Manager[™].

The first time you log on to the NV Manager[™], the NV Manager[™] uses the same language as the computer, if this is available otherwise it will start up in English.

The language can be set by clicking on "Settings" in the "Tool" menu.
