

Technical information

Thermal-Differential-Detector WSA 310 (Apollo 55000-127)

Description:

Thermal-Differential-Detector for early fire detection.
Alarm release in case of fast temperature increase. Max. approx 75°C with visual "release" display, including mounting base.

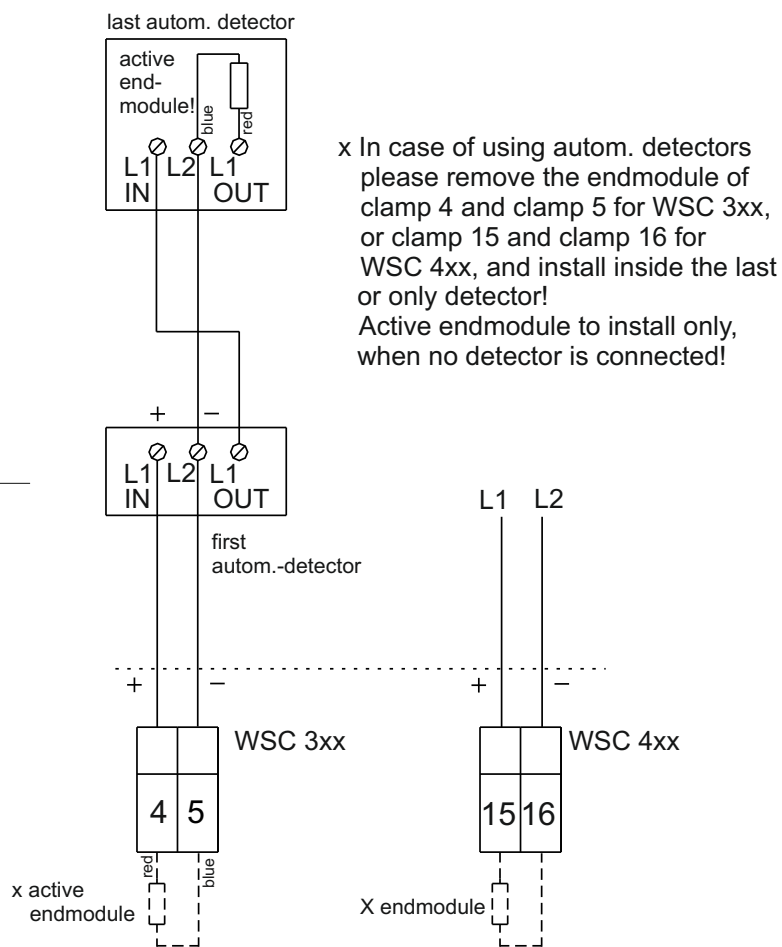

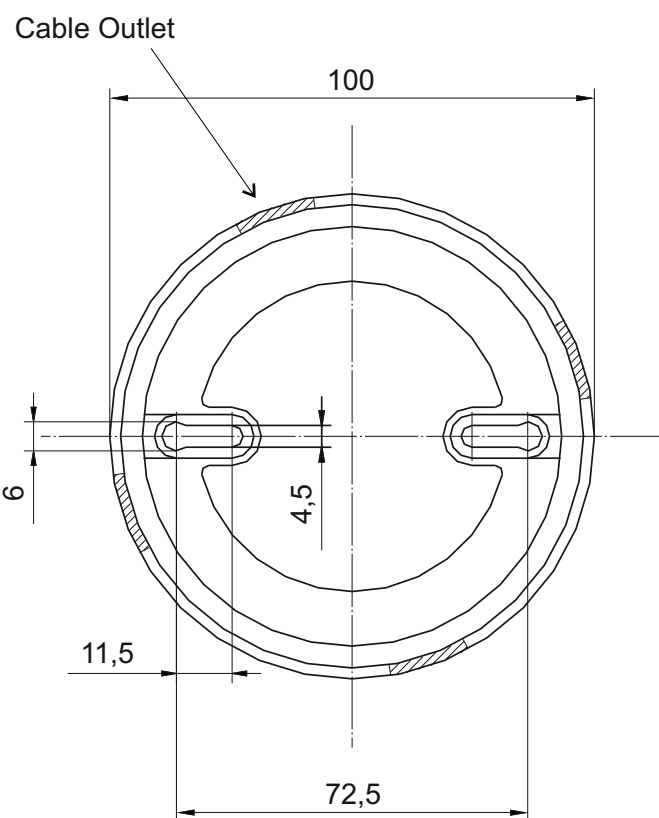

Approval-
NO.: G200060

Technical data:

Connection voltage: 24V DC
Current consumption (rest): 0,1 mA
Casing: AP-plastic, round, white
Operating temp.: -20° till +90°C

Electrical connection:
