MotorController and remote control

Comfort
ventilation

230V

Operating
voltage

24V

±24V DC
actuators

MotorLink®

Mobile
Management

Application

- for daily comfort ventilation
- for controlling ±24V DC standard window actuators and window actuators with MotorLink®
- up to 2 comfort ventilation groups with a max total power consumption of 6A
- may be combined with external temperature and time automated BMS
- wireless operation - opening/stop/closing of windows - via remote control (WCA 100) or app (Fresh Air Control)

MotorController for controlling ±24V DC standard actuators and MotorLink® actuators for daily comfort ventilation. It can also control locking actuators. The number of actuators that may be connected to the motor line depends on the type of actuator – see the table, “Maximum number of actuators per MotorController” for type/number.

Description

MotorController - WCC 106 A

The MotorController controls (opens/closes) the window actuators based on a signal from a remote control (WCA 100), the app „Fresh Air Control“, connected comfort keypads or the connected component(s) e.g. room sensors and weather sensors.

Connecting a room thermostat to the MotorController, gives the option for incremental opening / closing of the windows when the temperature setpoint is exceeded.

Up to 10 MotorControllers can be connected as part of a larger solution and may be connected to the same weather station.

Remote control - WCA 100

The remote control offers easy control of connected window actuators (open/stop/close).

The remote control can be paired to only one MotorController.

App - Fresh Air Control

From the app „Fresh Air Control“ you can control the windows the same way as with the remote control - open/stop/close. For an easy overview in the app can the windows / window groups be named.

The app can connect to several MotorControllers.

Prioritised inputs

The actuators may be overridden via three prioritised inputs. All switches must be potential free.

- common CLOSE ALL/safety (rain) function (highest priority)
- hand operation of the motor line
- automated control of the motor line (lowest priority)

Power supply for external units

When connecting sensors the auxiliary power from the built-in 24V DC 500mA power supply can be used

Specifications

- up to 2 motor groups with up to total max power consumption of 6A
- Max output voltage 24VDC at 230VAC
- simple and quick installation
- up to 10 MotorControllers may be linked
- rain/wind sensors can be connected
- roomthermostat can be connected
- 3 prioritised inputs
- wireless control via remote control WCA 100
- mobile management via app „Fresh Air Control“ (requires MotorController version 02 or higher)

The MotorController may either be mounted horizontally or vertically on a wall.

The remote control WCA 100 has an operation range up too 50m outside and 10m inside. Physical barriers such as walls, cabinets etc. will reduce the operation range.

Configuration

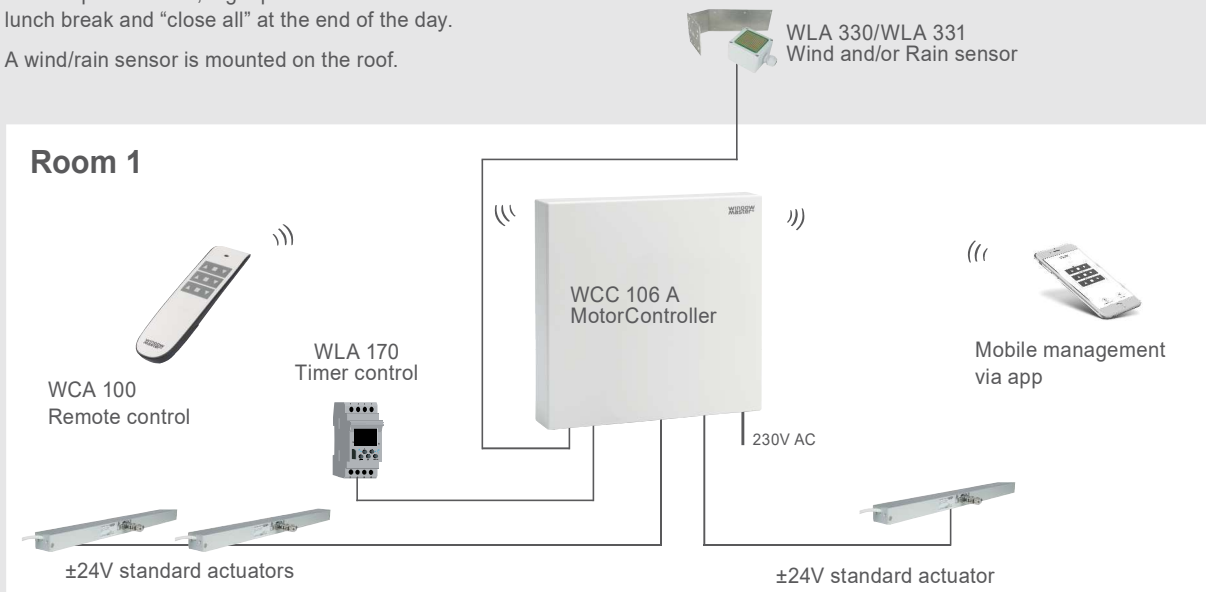

The MotorController has 8 DIP switches for configuration. The factory setting for all the DIP switches is OFF.

| DIP-switch | | |
|------------|--|---|
| Switch | Description | ON / OFF function |
| 1 | Maintained action | ON: the actuators open/close completely when the comfort keypad is pressed. OFF: the actuators run for as long as the comfort keypad is being pressed. |
| 2 | Rain delay | ON: the rain signal must be active min. 60 sec. before the actuators begin to close. OFF: the actuators begin to close as soon as the rain signal is activated. |
| 3 | Extended hand timer | ON: after manuel override the actuators are locked for 2 hours (except rain/safety signals). OFF: after manuel override the actuators are locked for 30min (except rain/safety signals). |
| 4 | Surveillance | ON: activate cable surveillance on input X10.1 (rain). The Input must be terminated with 10k resistor. OFF: no cable surveillance. |
| 5 | MotorLink® | ON: MotorLink® motors are connected to the MotorController. OFF: ±24V standard motors are connected to the MotorController. |
| 6 | 100% speed | ON: actuators run with 100% speed, when run manually. (requires MotorLink motors®) OFF: actuators run with 75% speed, when run manually. |
| 7 | Accumulated step | ON: actuators open/close in steps, when a thermostat e.g. WLA 110 is connected to the MotorController and the setpoint is exceeded. Opening step: 5% for every 5min Closing step: 10% for every 10min OFF: actuators open/close completely when a thermostat e.g. WLA 110 is connected to the MotorController and the setpoint is exceeded |
| 8 | Motor line 2, motors run independently | ON: the actuators on motor line 2 are controlled individually via input X2, X3, X4 and X5. Up to 4 actuators can be connected to motor line 2 and all actuators must be single / -1 actuators. The actuator's serial number determines, which input controls which actuator, the serial number is automatically identified by the firmware in the MotorController. X2 – controls the actuator with the highest serial number X3 – controls the actuator with the second-highest serial number X4 – controls the actuator with the second-lowest serial number X5 – controls the actuator with the lowest serial number The actuators can be identified by activating the different inputs. The serial number can also be read on the product label on the actuator. Actuators on motor line 1 are controlled together via input X10. Up to 4 actuators can be connected to motor line 1. All actuators on motor line 1 must be of the same type, incl. team size and chain length. The actuators must be either single /-1 or quad /-4. All connected actuators on both motor lines must be MotorLink® actuators and DIP switch #5 must also be set to ON. This DIP switch setting does not influence how the actuators on the two motor lines are controlled via the remote control. (requires MotorLink motors®) (OFF: 2 Motor groups with a motor line each |

Example 1: WCC 106 A with timer control and wind/rain sensor

In the room 3 pcs. $\pm 24V$ standard actuators are connected.
The remote control (WCA 100) or app (Frehs Air Control) is used for operation of the windows.
A timer control is fitted that opens / closes the windows in the room at preset times, e.g. open and close at start and end of a lunch break and "close all" at the end of the day.

A wind/rain sensor is mounted on the roof.

Example 2: WCC 106 A with room thermostat and comfort keypads

In both rooms MotorLink® actuators are connected.
In room 1 a room thermostat is connected for automatic opening/ closing of the window based on the room temperature. Comfort keypads are installed for individual operation of the actuators installed in room 1.
The app is used for individual operations of the actuators in room 2, but can also be used to operate the actuators in room 1.

A wind/rain sensor is mounted on the roof.

| Technical specifications - WCC 106 A | | |
|--------------------------------------|--|--|
| Output current | 6A incl. load on X7 (max 0.5A) | |
| Motor groups / Motor lines | Up to 2 motor groups with each 1 motor line. Either $\pm 24\text{V}$ standard actuators or MotorLink® actuators can be connected to the MotorController | |
| Primary voltage | 100-240 VAC 1.7A 50/60Hz | |
| Actuator secondary voltage | Nominal voltage Open circuit voltage at 230V AC (no load) Ripple at max load | 24V DC ($\pm 15\%$) 24V DC @ 20°C 200mVp-p |
| Power consumption | Idling < 0.5W Max load 150W | |
| Leakage current | max 0.75mA @ 240VAC | |
| Inrush current on primary side | 60A < 5ms v. 230V Max. 3 x WCC 106 A per 10A power supply group. Circuit breaker "C" characteristic. | |
| AUX | 24V DC, 500mA | |
| Operating conditions | -5°C - +45°C, for indoor installation, the controller may not be covered | |
| Switch-on duration | ED 40% (4 min. per 10 min.) | |
| Connection cable | Actuators Flexible max 6mm ² / solid max 10mm ² , max 2V voltage drop. Other components Min 0.2mm ² / max 1.5mm ² | |
| App | Control via app requires MotorController version 02 or higher | |
| Size | 215 x 206 x 37mm (W x H x D) | |
| Material | Plastic | |
| Colour | White (RAL 9016) | |
| Weight | 0.92kg | |
| IP rating | IP20 | |
| Safety class | I (with PE) | |
| Delivery includes | Standard version: MotorController with 1.2 m cable with Schuko plug UK version: MotorController with 1.2 m cable with Schuko plug with UK network adapter | |
| Note | We reserve the right to make technical changes and correct typing errors | |

| Technical specifications - WCA 100 | |
|--|--|
| Primary voltage | 2 x AAA alkaline batteries (1.5V) |
| Operation range between MotorController and remote control | - Outside: up to 50m in radius - Inside: up to 10m in radius Physical barriers such as walls, cabinets etc. will reduce the range. |
| Size | 41 x 18 x 144mm (W x H x D) |
| Weight | 61g (incl. batteries) |
| Delivery includes | Remote control with 2 x AAA Alkaline batteries |
| Note | We reserve the right to make technical changes and correct typing errors |

Max number of actuators per MotorController

The following table shows the maximum number of actuators, based on actuator type ($\pm 24V$ standard or MotorLink[®]) that can be connected to the MotorController. Total power consumption for all connected actuators may not exceed 6A.

| Actuator type | Per Motor line | | Per MotorController | |
|-----------------------------|---------------------|----------------------------------|---------------------|--|
| | $\pm 24V$ actuators | MotorLink [®] actuators | $\pm 24V$ actuators | MotorLink [®] actuators (2 motor lines) |
